HIGH SPEED DOORS

High Speed Door utilized for quick access among inside and outside areas of buildings. We are one of the manufacturers of High Speed Doors in India. We have experienced team who manufacture High Speed Door in such a way that it is easy to use. High speed door works smoothly without sound. It controls the temperature inside the room. High speed doors are used in food processing, healthcare and pharmaceuticals, automobiles, chemicals, warehouse etc.

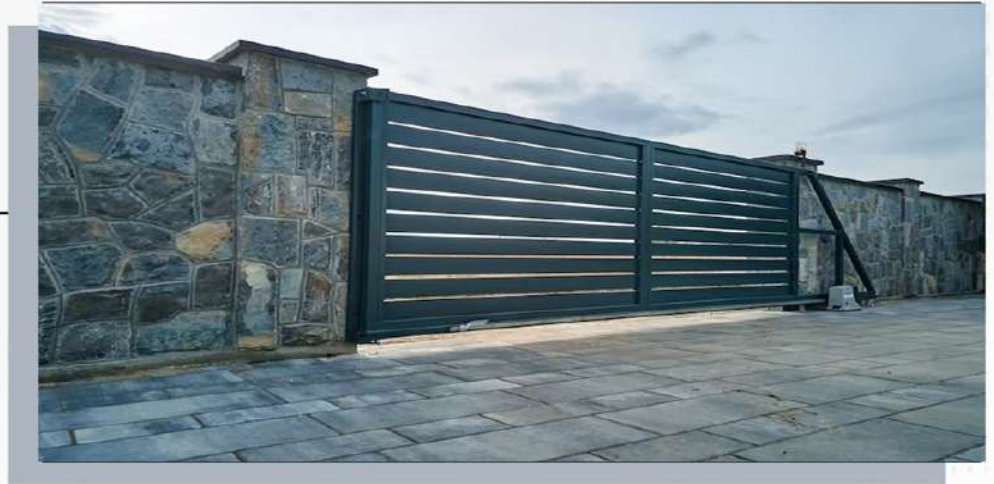

- Superior sealing to avoid dust entry, maintain asepsis and sterility.
- Designed for clean room area and corrosive environment.
- Easy to clean & disinfect, door is resistant to spray water.
- The door is pressure resistant while providing smooth operation cycles.

Nature Hygiene & Entrance Automations offers a wide range of Automatic Sliding Gate to the industrial and Commercial Sectors. We provide you with a beautiful designs as well as quality. Our sole goal is to provide our clients with low cost and high quality products. Here you can see some of our latest sliding gate designs. If you are looking for Automatic Sliding Gate Manufacturer in Delhi NCR then you are at right place.

Automatic Sliding Gates

- The advantage of using Sliding Gates is that they have no ground track or foundation in the roadway hence ideal for road surfaces which are uneven or sloping and vehicle does not experience any bumps.
- Smooth, quiet operation due to no supports at the bottom of the gate.

ROLLING SHUTTERS

To retain our goodwill in clients' consideration, we are providing an excellent range of Motorized Rolling Shutter. Making use of supreme quality and innovative methodology, the offered shutter is perfectly manufactured under the guidance of our qualified workforce with utmost care and perfection. To ensure its quality, our quality experts check the entire range on numerous measures of quality in adherence to defined industry standards.

MS Rolling Shutters

GI Rolling Shutters

GS Rolling Shutters

Aluminum Rolling Shutters

Polycarbonate Shutters

Each of our Rolling Shutters is solidly constructed to promote trouble-free operation and long life. The Rolling Shutters can also be designed as per client's specifications.

DOCK LEVELER

The dock leveler acts as a bridge between the loading area and the goods carrier, thus making it easier for the goods to disembark. The dock leveler balances the difference between height and distance. The dock leveler is made using corrosion resistant steel, which makes the dock leveler useful for a very long time. We are one of the dock leveler manufacturers in India. Our experienced team manufactures the dock leveler keeping in mind all the norms.

Hydraulic Dock Leveler

- Dock Levelers are low cost yet high performing solutions for applications that have standard or little variance in truck bed heights at loading dock.
- Our dock Levelers are available in both versions mechanical (manual) and hydraulic.

Retractable shelter is designed to perfectly suit warehouses, logistics centres and other premises with medium cargo traffic. PVC fabric used for front curtains is highly elastic and wear and tear resistant. Trailers back into the shelter during loading/unloading operations while head and side curtains create a tight seal against the truck top and rear body. In case of off-center parking the collapsible frame retracts upon impact and automatically returns to its original position after truck departure. The shelter is mounted using the suspended method of installation.

Retractable Dock Shelter (Collapsible)

- When the truck touches the dock to load goods, the dock shelter can wrap the back of the lorry to ensure a closeness and dustproof environment.
- Drainage system prevents water from getting into the loading zone.

INDUSTRIAL SECTIONAL DOOR

Industrial sectional doors are designed for industrial buildings, warehouses, production workshops, transport terminals and a variety of industrial premises, where they have to meet stricter requirements if compared with garage sectional doors. Enhanced durability guaranteed by sturdy door construction makes them not only functional but also able to withstand the daily operations in the toughest industrial environments. A perimeter sealing system provides premium thermal efficiency, maintaining the required temperature regime which is an important feature for almost any industrial facility. The door leaf is balanced with a torsion spring mechanism fitted with a QuickFix system which significantly reduces installation time.

Industrial Sectional Door

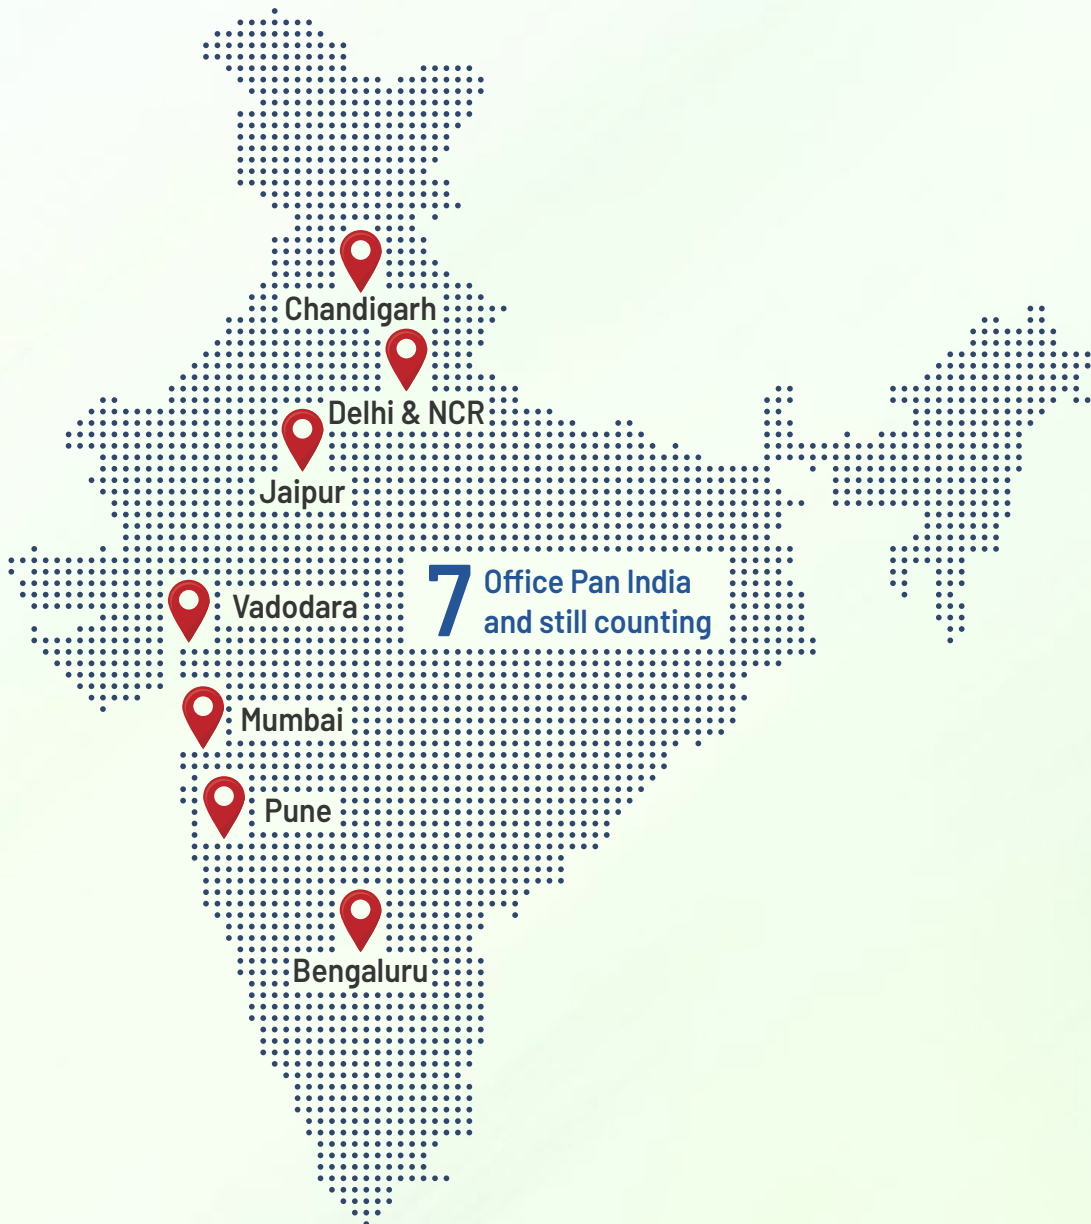

- Thermal break, efficient perimeter sealing system make these doors ideal for any climate.
- Provide proper protection from water, snow, dirt, and direct sunlight.
